DETAILED ACTION

1. The following is an examiner's statement of reasons for allowance:

A micromixer for mixing at least two reactants having penetrations for the supply of the reactants and/or discharge of the products comprising: at least one mixing plate with microstructures that define mixer cells, each of the mixer cells having a feeding chamber which adjoins at least one group of digital channels which intermesh in a comb-like manner with the digital channels of a group from the adjoining feeding chambers to form a mixing zone; and a discharge plate arranged on the mixing plate, the discharge plate having an outlet port above each mixing zone, the outlet port extending perpendicularly to the digital channels, wherein an mixer cell has at least two mixing zones. The micromixer supersedes the prior art micromixers by permitting significantly greater throughput at the same pressure drop. The number of microstructures per surface area is increased thus increasing the throughput.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brauner et al. teach an apparatus for the static mixing fluid which comprises a pipe which contains pairs of comb-like plates which are arranged so that the webs of the one plate extend cross-wise through the slots of the other. This apparatus does not anticipate nor render obvious the micromixer as claimed.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.
